CST1500 Computer Systems Architecture and Operating Systems

Online Session

Adam Philpot

Lecture Videos

- Week Eight

- Lecture 16 Memory Management
- Lecture 17 Virtual Memory

Formative Test 2

- You may take the FORMATIVE Test 2 to test yourself on what you have covered in the lectures.
- It covers material from Lecture 07 – Lecture 13 inclusive.

- Friday 09:00 – 12:00.

- At home or in the lab.

- Does **NOT** count towards your grade for the module.

Coursework 2 – Python Groupwork

- We have 14 groups thus far with 2 groups looking for a 3rd member.
- This leaves around 15 groups to be made.

- Let me know the members of your groups ASAP!
- Deadline is Friday 12pm to tell me or Ali your group members.

- Remaining students will be assigned to a random group and notified via email. The group member names will be shared, but it will be your responsibility to message the group members through the message feature of My Learning.

Message via My Learning

- … Demonstration

Module Survey

- The survey team made a mistake and erased the results.
- Please complete it again if you did already.
- Please complete it today – 15 mins will be set aside now to do that.

- **Very important that you complete the survey!**

My Surveys

Have your say

As a university, we really value your feedback on your experience. By having your say, together we can continue to shape and improve your experience.

Please complete this survey(s). Your responses are completely confidential and results are anonymised. Once the survey closes, you will receive a response on how the results will be used.

Middlesex University London

Coursework 2 Questions

- Any questions on Coursework 2?
  - Contribution spreadsheet?
  - CPU algorithm specifications etc.

- Break tasks down into smaller tasks.
- Research each algorithm.
- Decide who will do what – various options:
  - 1 CPU algorithm each / all work together / 1, 2 or 3 CPU algorithms?
  - All work on the report together?
  - One person who is not so good with coding does the report?
