CST1500 Computer Systems Architecture and Operating Systems

Online Session

Adam Philpot

Lecture Videos and Slides

- Week Ten

VIDEOS

- Lecture 20 Protection
- Lecture 21 Network and Distributed Systems

SLIDES

- Lecture 20 Network and Distributed Systems
- Lecture 21 Introduction to Cloud Computing (A bit outdated)

Week 10

- Week Ten is a catch up week.

- There will be a FORMATIVE test (Test 3 – last one) next week which will cover lectures 14 – 21 inclusive.

CW1 Results – Re-submission

- If you received 19 or less marks, you did not pass the coursework.
- Good News! You can re-submit!
- Check the feedback, complete the work and submit by 13th December 2024 – Week 12.

- Use the following link in the Coursework One folder on the course page - Available now:

  Re-Submission - Coursework One - SOB Portfolio - Hendon Campus Re-Submission Link

- **Eligible Students ONLY can submit here!!**
- **If you did not submit anything, you cannot re-submit…**

Coursework 2 – Python Groupwork

- IMPORTANT
- If you have any issues with group members:
  - No response to messages.
  - Not getting work done on time.
  - Lack of engagement.
  - Any other issue.

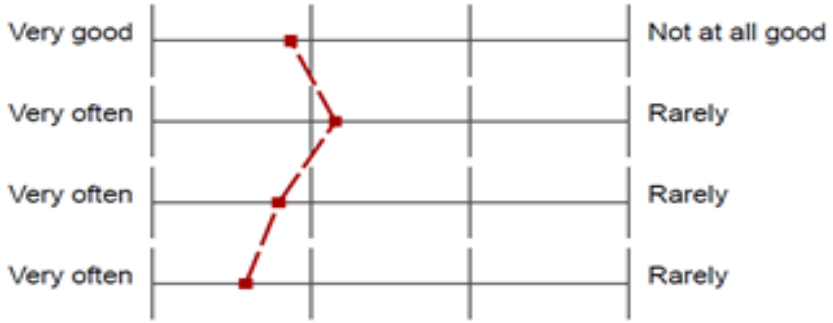
- Let me or Ali know ASAP – in person or via email.

Module Survey - Results

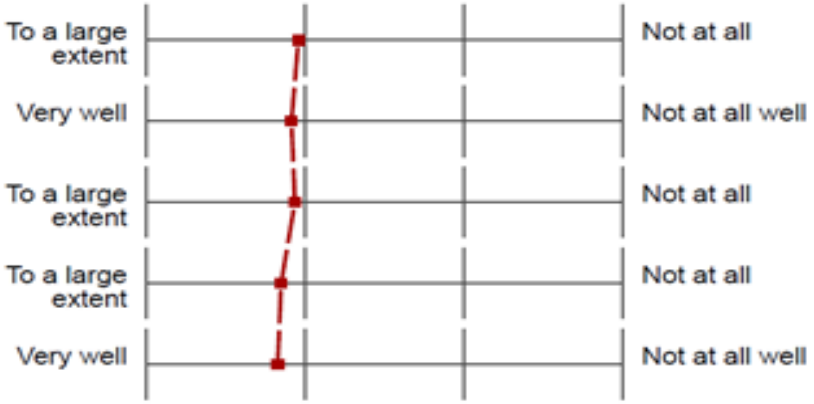
- Thank you to everyone who participated – it is highly appreciated.
- 49% response rate -> 46 / 94 students
- Average attendance across the 3 sessions from week 2 – week 9 -> 50 students
- Fair to assume that the responses are from the regularly attending students.

Module Survey - Results

1. Teaching on my module



2. Learning opportunities



Module Survey – Where to improve?

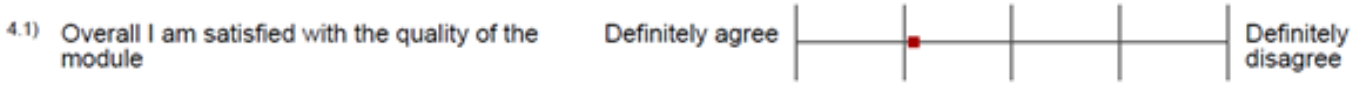
- Engagement – we will try to improve the engagement in the labs and workshops:
  - Review, restructure and record new lecture videos.
  - Integrate the lecture series with the labs/workshops in a meaningful way.
  - Explore more topics covered in the lecture series in the labs/workshops.
  - Cover the programming languages in more depth in the workshops – as opposed to just code demos.
  - Present/discuss a range of coursework examples and the marks that they may achieve as an indicator (quite difficult as it may encourage copying).

- Although these improvements will not benefit you, as you have almost completed the module, they will (hopefully) make the module even better than it currently is.

Module Survey - Results

3. Assessment and feedback

4. General



Module Survey – Overall

- Generally positive, encouraging results ☺
- There is always room for improvement!
- Small number of issues which appeared to be very personal and related to an individual's situation, as opposed to a general issue (some of which have been addressed already). Do reach out to me if there is anything you would like to discuss.
- If you are ever having a bad experience, issues with the work/environment etc. always speak to somebody about it. In the first instance - your lab tutor or module leader.
- We have lots of available support -> UniHelp.
