# CST1500 Computer Systems Architecture and Operating Systems

Workshop

Adam Philpot

# General Schedule of Workshops

- Announcements
- Discussing coursework specification (Next week Coursework One).
- Covering weekly topics
- Code demos
- Interaction
- Discussions

# Announcement One

- Friday Lab times have changed.
- New Lab time:

**FRIDAY 9:00 am – 12:00 pm**

- This is for everyone.
- Timetables will be updated on Friday.

# Announcement Two

- Week One Lab Worksheet
- Under the Lid of a Personal Computer
- No machines available to experiment with (Sorry!)
- Not essential – opportunity to play!

# Announcement Three

- My office hours have changed.
- I noticed that all (or the majority) of you have a workshop for CST1510 on Friday 12:30 – 14:30.

- New office hours:
- Wednesday 14:00 – 16:00
- TG03

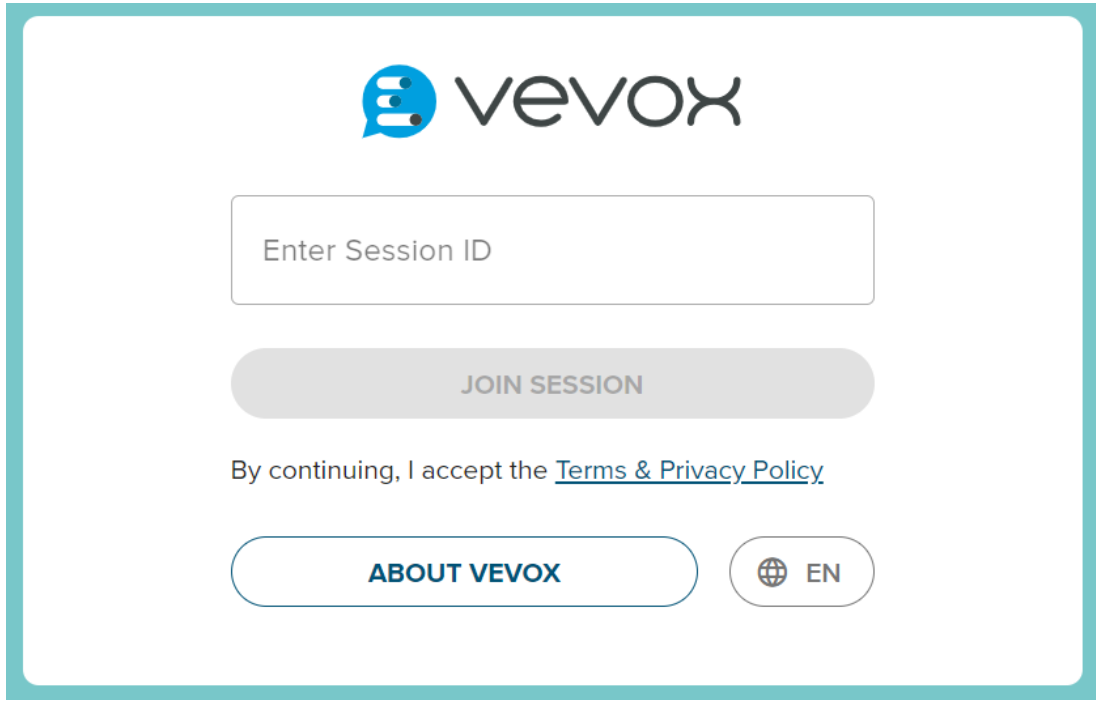
- The module handbook is updated.

# Vevox

- Interactive polling application
- Go To:

**https://vevox.app**

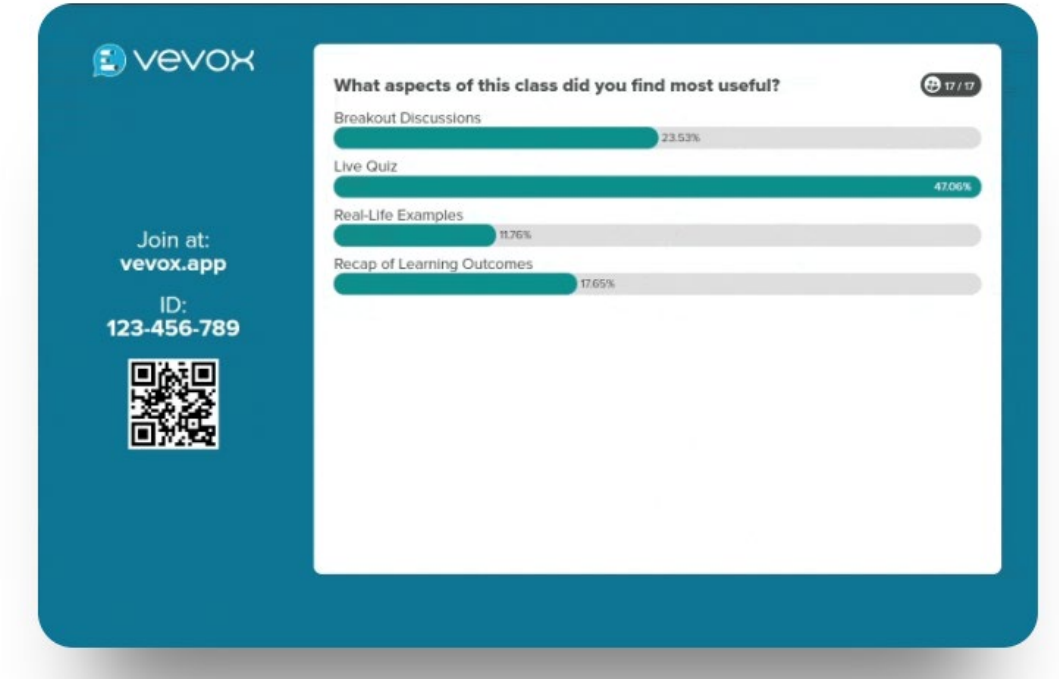
- Enter session ID
- Answer questions
- See results



# Types of polling/voting

- Multiple Choice
- Wordcloud Poll
- Open Text
- Star Rating
- Slider Rating Poll
- Numeric
- Ranking
- XY Plot
- LaTex
- Pin on image & image polling

# Vevox – What you see



# Anonymous

- Vevox is anonymised - can be identified but requires permission from the participant

- I will be using Anonymised (unless identification is required)
  - More relaxed
  - Provides confidence to students to get involved
  - Helps to ease social anxiety
  - Maximises participation
  - Encourages honesty

# Let’s give it a try!

- Go to:

**https://vevox.app**

- Enter the ID:

**180-581-743**

# Lecture Videos

- Weekly worksheet schedule for the week – which videos to watch

- Week One
- Lecture 01 Data Representation 1
- Lecture 02 Data Representation 2

- Check worksheet on a Monday and try to watch the video/s before Friday

# Lab 1 Worksheet

- Under the Lid of a Personal Computer ✓
- Number Systems ✓
- Introduction to C Programming: Data Representation

# C programming

- Run code in the browser via:

https://www.onlinegdb.com/

- Use an IDE such as Visual Studio Code:

https://code.visualstudio.com/docs/languages/cpp

- Install C/C++ extension

https://code.visualstudio.com/docs/languages/cpp

# Configuring VS Code

- Follow the instructions here:

https://www.freecodecamp.org/news/how-to-install-c-and-cpp-compiler-on-windows/

- You may need to install the compilers again.
- You may need to add some recommended extensions that VS Code prompts you with.

# Resources for C

- The pocket Book in the Week 1 folder.
- W3 Schools, geeksforgeeks or other online resources:

https://www.w3schools.com/c/index.php

https://www.geeksforgeeks.org/c-language-introduction/?ref=shm

- Everything you need to know is **NOT** in the lab worksheet.

# Questions
