CST1500 Computer Systems Architecture and Operating Systems

Workshop

Adam Philpot

Lecture Videos and Slides

- Week Twelve

VIDEO and SLIDES

- Lecture 22 Revision

Week 12

- Week Twelve is a catch up week and is mainly for completing Coursework Two.
- Meet with your groups, finalise the work, record the video demo, and delegate who will submit the work.
- Complete Coursework One if you are eligible to re-submit.

CW1 Results – Re-submission

- If you received 19 or less marks, you did not pass the coursework.
- Good News! You can re-submit!
- Check the feedback, complete the work and submit by 13th December 2024 – Week 12.

- Use the following link in the Coursework One folder on the course page - Available now:

  Re-Submission - Coursework One - SOB Portfolio - Hendon Campus Re-Submission Link

- **Eligible Students ONLY can submit here!!**
- **Marks will be available after 17th January (15 working days – possibly sooner).**
- **If you did not submit anything, you cannot re-submit…**

Coursework 2 – Python Groupwork

- IMPORTANT
- If you have any issues with group members:
  - No response to messages.
  - Not getting work done on time.
  - Lack of engagement.
  - Any other issue.

- Let me or Ali know ASAP – in person or via email.

Attendance with Vevox

- Go To:

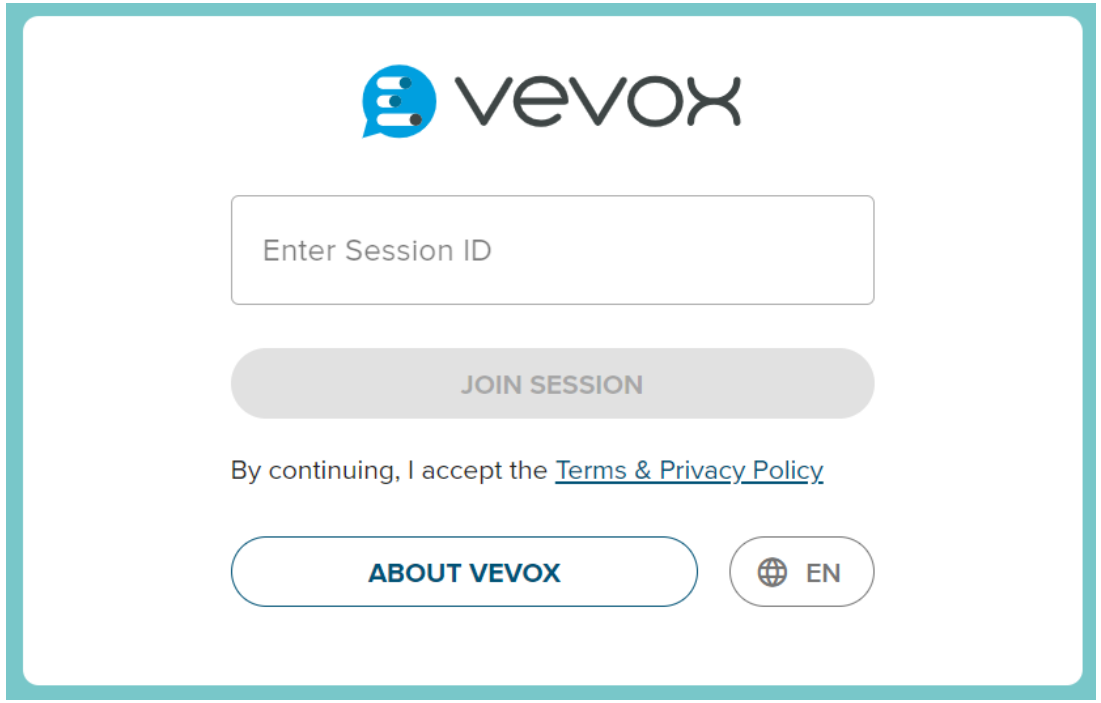
https://vevox.app

- Enter session ID

146-504-841

Enter your first and second name

- OR Enter your student ID
- OR Enter both/all



Coursework 2 – Python Groupwork

- IMPORTANT
- One member of the group should make the submission – the group should decide who makes the submission:
  - Make sure the work is completed on time.
  - Give the nominated group member enough time to collate everything and submit.

- DEADLINE
- Friday 13th December 18:00 (2 hour window -> 20:00)

Coursework 2 – Python Groupwork

- IMPORTANT
- Work received after 20:00 will incur a 10% penalty on the final mark – ALL MEMBERS of the group will incur the penalty, not just the member who submitted the work.

- There is NO RE-SUBMISSION allowed for Coursework 2.

- Marks will be entered into the contribution spreadsheet and emailed to you individually after 17th January (15 working days - possibly earlier).

Coursework 2 – Python Groupwork

- Code:
  - FCFS.py
  - SJF.py
  - RR.py
- Report:
  - Word .docx
  - PDF
- Contribution Spreadsheet:
  - MUST be filled in correctly i.e. no errors in the ‘Contribution Check’ column
- Video demonstration:
  - ONE .mp4 format video

Semester 2 – Cyber Security and Forensics

- CST1530 – Computer Networks
- Alex Ali – a.x.ali@mdx.ac.uk
- Olugbenga Oluwagbemi – o.oluwagbemi@mdx.ac.uk
- Practical and conceptual skills that build the foundation for understanding basic networking and develop the skills and responsibilities of network technicians, network administrators, and network engineers.
- The 'layered' approach to networks by examining the OSI and TCP/IP models in detail.
- Topics covered:
  - Network devices
  - Network addressing schemes and the types of media used to carry data across a network.
  - Routing protocols and learn how to configure, verify, and troubleshoot routing operations.

Semester 2 – Information Technology

- CST1133 – Foundations of Computing
- Francois Chadebecq – f.chadebecq@mdx.ac.uk
- Can Baskent – c.baskent@mdx.ac.uk
- This module teaches you the fundamental knowledge and principles of computer science theory, such as discrete mathematics, propositional logic and graph theory. You will study the existing fundamental algorithms that are ubiquitous across computer networking and programming, gaining insights into their application in real-world computing systems.

Semester 2 – Both

- CST1340 – Information in Organisations
- Roman Belavkin – r.belavkin@mdx.ac.uk
- Bahareh Langari - b.langari@mdx.ac.uk
- In any modern business environment, data is used to store, preserve, search, retrieve and display information to improve important business processes. This module provides a comprehensive introduction to database design, technology, implementation and manipulation - core IT skills and a firm foundation for higher-level academic study or a rewarding career in many IT related areas, such as data analytics.

MDX Works – Industrial Placement
